## Parents . . .

TransParenting is an educational program designed to teach effective parenting during the transitions of divorce or parental separation. It impresses upon parents the critical role they play in their child's ability to adjust to changes surrounding divorce.

Our mission is to provide educational tools that help families move through significant change.

The program emphasizes each parent's responsibility to provide a nurturing, non-threatening environment for the child. This is an educational program and not a counseling session.

*"I have the right to be told that my mother and father will always love me."*
